

**REMARKS**

The Official Action of January 11, 2005, and the prior art cited and relied upon therein have been carefully studied. The claims in the application are now claims 2-7, and these claims define patentable subject matter warranting their allowance. Favorable reconsideration and such allowance are respectfully urged.

Claim 1 has been cancelled and new claim 7 added. Claims 2-7 remain in the application for consideration.

In response to the Examiner's objection to and rejection of the claims under 35 U.S.C. §112, second paragraph, Applicant has canceled claim 1 in favor of new claim 7, which has been rewritten to clarify the claimed structure and its function in a manner that eliminates all the problems identified by the Examiner. Applicant respectfully submits that the Examiner's objection to and rejection of the claims has now been overcome.

Applicant has further amended the drawings to identify structural features described in the specification but not shown in the drawings, and has amended the specification to eliminate a number of idiomatic problems. Applicant has also corrected a number of lead lines in the drawings to better identify structural features described in the specification. Applicant

Appln. No. 10/621,607  
Amdt. dated April 1, 2005  
Reply to Office Action dated January 11, 2005

believes that no new matter has been introduced through these amendments.

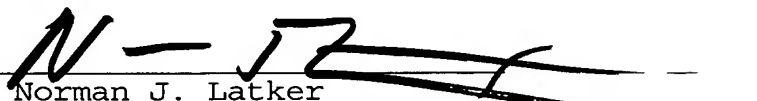

Applicant thanks the Examiner for his indication that claims 3, 5 and 6 would be allowable subject to being rewritten in independent form and to overcome the Examiner's 35 U.S.C. §112, second paragraph rejection. In response, Applicant has drafted new independent claim 7 so as to overcome the Examiner's 35 U.S.C. §112 rejection and to include the features of allowable claim 3. Accordingly, independent claim 7 and claims dependent therefrom are all allowable, and that this application is now in condition for allowance.

The prior art documents made of record and not relied upon have been noted along with the implication that such documents are deemed by the PTO to be insufficiently pertinent to warrant their applications against any of applicant's claims.

Favorable reconsideration and allowance are earnestly solicited.

Respectfully submitted,
